

VPK Group Commissions FMW Industries to Supply OCC Pulper Feeding Line in Belgium

VPK Group, a leading global supplier of sustainable packaging solutions, has tasked FMW Industries with this project. This significant collaboration, which also involved our Benelux sales representative XTECX, builds on FMW's successful track record of supplying various systems to VPK Group plants in France.

The delivery scope includes a new OCC pulper feeding line for efficient and stable pulper operation, as well as a fully automatic OCC bale wire cutter (FMW Type AD1500-II) designed to cut the wires on both sides of the market bales, vertical and horizontal.

The state-of-the-art system, with a capacity of 1,200 BDMT per day, will be delivered to VPK Group's Oudegem facility in Belgium. The commissioning is scheduled in October 2025, the delivery will also include transport and supervision services to ensure a smooth installation and start-up process.

About VPK Group

VPK Group is a dynamic and innovative Belgian company specializing in the production of high-quality recycled paper, corrugated cardboard packaging, solid board packaging and cores. With a strong commitment to sustainability, VPK Group focuses on reducing its environmental impact while delivering exceptional value to its customers.
